## **PROBLEM OVERVIEW**

Cryptocurrencies have the potential to positively impact the way we use the money and to solve many problems faced by developing countries such as financial exclusion, hyper-inflation and countries default.

Since anyone with an Internet connection can instantly access it they provide us an alternative to the current financial system bringing the benefit of the accountability and transparency of the Blockchain technology, with less expensive and foster transaction.

## **INFLATION**

in developing countries such as Venezuela, life's a struggle as inflation heads for one million percent. 2B people in the world without any access or ability to obtain a bank account or manage their money.

## **DESPITE ALL THE BENEFITS, CRYPTOCURRENCIES HAVE NOT BEEN WIDELY ADOPTED. WHY?**

### **VOLATILITY**

One of the big problems is the volatility of the cryptocurrencies that are currently on the market. The merchant cannot take the risk of engaging in a sale, only to see how the value of that sale plummets the next day. Volatility has also been a serious concern especially for investors who would like to invest in projects that bring value and are not shaken by market sentiment.

### **COMPLEXITY**

On the other hand, the cryptocurrencies tools are complicated to use for those who are not tech savvy, extra and complicated software should be used to accept crypto payments, and it is difficult to exchange crypto-asset to fiat money.
